UI Design

Marketing

I loved playing video games growing up, and it inspired me to make a cafe game on Roblox. I helped design the branding, logo, creating menus, and imagining how players would interact with the cafe space. Without even realizing,

it, I was learning the fundamentals of marketing and design, and I really enjoyed it. This passion naturally led me to pursue a path that combined business and design, which is how I found myself in Global Business & Digital Arts.

My

Style

My favorite designer is Jaehoon Choi, known as @pranky26. His work has a perfect balance of simplicity and boldness. I admire how his designs are clean, neat, and organized, yet at times he's not afraid to experiment with bright and vibrant colors to make his pieces stand out.
